

DO YOUR JOB SHEETS NEED AN UPGRADE?

Tom Cullinane, our Job Sheets expert.

CREATE AND SEND THEM AUTOMATICALLY

Save time and avoid mistakes by creating and emailing job sheets automatically when the job has finished (or after a quick check).

"I have a customer who always gets great reviews about the speed of their responses. They've set their job sheets to send automatically as soon as a job has finished."

CUSTOMISED FOR CUSTOMERS

Create tailored job sheets for each job type to meet customer-specific needs and requirements.

"Some of our customers have really specific requirements for compliance and reporting. They can programme the system to send different information to different customers, it's really clever."

STORE THEM EASILY ON A CUSTOMER PORTAL

Keep job sheets organised and provide customers with a portal for quick and easy access.

"Our customers that use their booking portal tell us it's changed their lives. No more customers ringing up and disputing time on site, etc."

UPDATE THEM IN REAL-TIME

Get real-time updates on job sheets to prevent delays and outdated information.

"Some of our customers used to wait 2 weeks to get a scrappy bit of paper that's been on the van floor with zero information on it. Getting instant updates has been a game-changer for them."

LOOK PROFESSIONAL

Make a great impression with polished and professional job sheet templates.

"I have some customers that have created super-impressive job sheet templates. They really say 'we know what we're doing' as soon as you see them."

ATTACH YOUR FILES

Attach related files and images directly to job sheets to keep your team organised and prevent lost documents.

"For customers that visit sites with specific RAMS, being able to attach files to jobs or access them from the cloud means no more trips to the office."

ACCURATE TIME TRACKING

Ensure fair billing and avoid disputes with automatic time tracking for each task.

"One new customer previously had the profits from entire routes wiped out when the new ULEZ charges came in. Now those extra charges are automatically added when drivers enter the zones, meaning no more nasty surprises."

SEE TRENDS AND REPORTS

Use built-in reporting tools to easily analyze trends and make informed decisions for your business.

"The new dashboards are amazing and work brilliantly together with our reports. You can't manage what you can't see and this way you can see everything."
